Acknowledgement

This thesis would not be possible without the help of some individuals. First and for most I would like to express my deepest gratitude to my supervisors, Mr. Anoop Singh for his help, valuable advice, continuing support, endless patience and guidance throughout my thesis.

I have special thanks to Mr. Nilesh Kela, Team Leader at Green Design and Engineering Services pvt. Ltd. who have helped me throughout my thesis work. I appreciate his help during the field measurement since working with total station and auto level instrument was very difficult to do alone.

I am also grateful to Mr. Sudhir Ghate, Project Manager of Maruti Infracreation pvt.Ltd. for his support, encouragement and follow-ups throughout my study. His overall support and depth of knowledge encouraged me to work more precisely.

I am very grateful to my college guide Dr. Unnati Patel (Head of Department, M.Sc. Geoinformatics) for her help and support. I have learned more than I expected and so I am very lucky to be her student.

I am also thankful to Krunal Sir (Assistant Professor, Department of M.Sc. Geoinformatics). And all my classmates who have been extremely supportive and have helped me to complete my work successfully.
